Bekräfta lösenord: Confirm password

All the boxes with a red star in front of them has to be filled in.

When you have done all this push the button **Fortsätt**

You are now logged in to the Internetauction so you can put bids on the horses.

The auction starts 18.00 CET and ends 21.00 CET. We have something called dynamic bidding. It means that the last five minutes of the auction the auctions gets extended with five minutes from the last bid. So if somebody makes a bid 20.57.51. The new end time for the auction on this horse is 21.02.51. If somebody then make a bid 21.01.30. The new end time for this horse is 21.06.30 and it goes on like that until nobody bids in the five last minutes from the last bid. Then the auction on that horse ends.

#### **How to make a bid on the Internetauction:**

You start with going in on this link <http://shop.asvt.se/index.php?route=product/category&path=73> where you can see all the horses. On that page you can follow all the horses that's for sale on this Internetauction. But very important to know that this auctions list are not updated continuously. Only every minute. So if you want to follow a special horse then click on that horse and then you come to the horse own page. On the horses own page the bid gets updated quickly after a new bid is made.

When you make a bid you go in to the horses own page. There you will see two boxes where you can fill in an amount (All amount shown are in Swedish currency). One Maxbud (Maxbid) and one Bud(Bid). The "Bud" box you can't see first at 18.00 CET when the auction starts. "Maxbud" you use when you don't have the time or don't have the energy to follow the auction live until the end. Then

you can make a "maxbud". So if the highest bid you want to make on the horse is 100 000 SEK. Then you write in 100 000 in the box of "maxbud". Then push on "maxbud". Then there comes up a popup window where you have to confirm that you really want to make this bid. If you want to make the bid you push OK in that window. The "maxbud" is an order to the system to bid to a certain amount and in this case 100 000 SEK. So when the auction starts and somebody else has made a bid of 5 000 SEK. You are going to get the leading bid at 6 000 SEK. If somebody bids 20 000 SEK you're going to get the leading bid at 21 000 SEK. So the system is going to bid 1 000 SEK over the bid that's made all the way up to a 100 000 SEK. If somebody make a "bud" at 100 000 SEK when you leading the auction on 99 000 SEK or lower they get the bid 100 000 before your "maxbud" because a "bud" is considered to be made before the "maxbud". If somebody bids over your maxbud you can bid a new maxbud or normal bud. A maxbud can be made before 18.00 CET but also as long the auction on the horse is active. So no problem to use maxbud after 18.00 CET. When the auction starts at 18.00 it comes up another box where you can bid. It's called "bud" and when you make a bid with "bud" it's the amount you write in the box that you put in. If you win the auction we send your information to the seller. Take the contact information on the horse's page to the seller and you can contact them the day after.
